EDUCATION

BALIUG UNIVERSITY — COLLEGE OF INFORMATION TECHNOLOGY EDUCATION

Bulacan, Philippines

Bachelor of Science in Information Technology (BSIT) — Network Administration & Security

Expected 2026

- **Key Coursework:** Network Security & Admin, Systems Administration, Database Management Systems, Software Engineering, Cloud Infrastructure, Cryptography, CCNA Security, Linux Admin, Information Assurance & Security.

TECHNICAL SKILLS & CERTIFICATIONS

Cybersecurity & Networking: Qualys VMDR (TruRisk/QVS/QDS), SIEM (Splunk, Chronicle), Cisco IOS, Multi-Area OSPF, IPsec VPN, GRE Tunnels, VLAN Trunking, ACLs, Firewall Hardening, Wireshark, Zero Trust & IAM, Penetration Testing.

Cloud, Systems & Automation: AWS (EC2, S3, IAM, VPC, CloudWatch), Linux/Unix Administration, Python 3, Bash Scripting, Git/GitHub, CI/CD Workflows, Desktop & Server Provisioning, VirtualBox Linux SIEM Lab.

Web3, Development & Analytics: Stellar Blockchain, Soroban Smart Contracts, Rust, JavaScript, TypeScript, React.js, Vite, SQL Server, Microsoft Power BI (DAX, Data Modeling), REST APIs, Advanced Excel (950/1000).

Industry Certifications (19 Earned): Qualys Certified Specialist: VMDR (Aug 2026) • Google IT Automation with Python (July 2026) • Google Cybersecurity Professional (July 2026) • AWS Academy Cloud Operations (Jan 2026) • Cisco: Ethical Hacker, Linux Essentials, Networking Basics, IT Essentials (2025–2026).

PROFESSIONAL EXPERIENCE

TELEWORK PH

Bulacan, Philippines

IT Operations & Security Intern

August 2026 – Present

- Provision, configure, and maintain enterprise workstation hardware, OS images, and peripherals for 100+ end-users in a high-density 24/7 BPO operations environment.
- Triage and resolve Level 1/2 hardware, software, and network troubleshooting tickets via Slack helpdesk queues, maintaining a >95% SLA resolution rate and minimizing workstation downtime.
- Execute endpoint security audits, user access provisioning, and system patch remediation routines in compliance with corporate information assurance protocols.
- Collaborate with network engineers to diagnose LAN/VLAN switchport anomalies, verify firewall rule integrity, and maintain high enterprise network uptime.

TECHNICAL & SECURITY PROJECTS

SorobanAuditor — Smart Contract Security Scanner (SAST Framework)

2026

Lead Security Engineer | Python, AST Parsing, SAST, Rust Soroban, CWE/OWASP Mapping

github.com/MarkAngelGuevarra/SorobanAuditor

- Engineered a Static Application Security Testing (SAST) CLI framework in Python to audit Rust-based Stellar Soroban smart contracts for authorization bypasses, reentrancy vulnerabilities, and exposed secrets before mainnet deployment.
- Implemented Abstract Syntax Tree (AST) parsing algorithms to statically traverse contract execution flows, automating detection of OWASP & CWE vulnerability patterns with standardized CVSS severity reporting.

Enterprise Multi-Site Secure Network Topology

2025 – 2026

Network Security Architect | Cisco IOS, Multi-Area OSPF, IPsec VPN, GRE, VLANs, ACLs

Cisco Simulation

- Architected and simulated a redundant multi-branch enterprise network topology utilizing dynamic multi-area OSPF routing with MD5 authentication and site-to-site encrypted GRE over IPsec VPN tunnels.
- Hardened Layer 2/3 perimeter defenses using DHCP Snooping, Dynamic ARP Inspection (DAI), Port Security, and extended ACLs, enforcing granular departmental isolation and preventing spoofing attacks.

KlassPay — Web3 Split-Payment Protocol on Stellar Mainnet

2026

Full-Stack Web3 Developer | React, Vite, Soroban Smart Contracts, Stellar SDK, TypeScript, Supabase

github.com/MarkAngelGuevarra/KlassPay

- Engineered non-custodial smart contracts in Rust (Soroban) deployed on Stellar Mainnet to lock, track, and disburse split contributions without intermediary fees; integrated Freightier wallet authentication and simulated GCash offramping.
- Implemented Stellar FeeBumpTransaction gasless sponsorship pipelines, successfully onboarding 115+ verified mainnet users with a 4.8/5.0 CSAT satisfaction rating (RiseIn Level 6 & 7 Certified).

HONORS, AWARDS & LEADERSHIP

World Computer Hacker League (WCHL 2025) — Philippines Representative

July 2025

- Personally selected to represent the Philippines by ICP HUBS Network / Internet Computer in a global 4-month Web3 hackathon and builder's league, competing in elite talent discovery and decentralized application development.

APAC Stellar Demo Day Manila — Finalist Project Submission

July 2026

- Selected project finalist by Rise In & Stellar to present decentralized blockchain architecture at GCash Office Manila (\$60k prize pool) to regional Web3 developers and institutional partners (PDAX, Coins.ph).

Cisco Networking Academy Student Congress 2026 — University Representative

January 2026

- Represented Baliug University at Holy Angel University (Pampanga) in team-based enterprise networking and cyber defense CTF challenges under the theme "Future-Proofing Networking Skills in the Age of AI".

4th Regional Cybersecurity Conference & Web3 Bulacan — Delegate

2025 – Present

- Participated alongside industry professionals in technical discussions covering vulnerability management, digital forensics, defensive security protocols, and decentralized technology foundations.
